

# Table of Contents

An editor has a default border and focus border. It looks like following:

But sometimes you want a specific color for the border:

It's simple to set your custom border color, e.g.

```
editor.setStyle(new Style("f_border_color_#aa0000"));
```

The format is: f\_border[\_focused]\_color{[\_#ColorInHex]}[\_#ColorForDarkMode]

{ } ⇒ required

[ ] ⇒ optional, can be cut out

More details can be found [here](#).
