Table of Contents

We support a simple-to use button group:

Just add following code in your screen:

```
ButtonGroup butgrp = new ButtonGroup();
butgrp.setHorizontalAlignment(IAlignmentConstants.ALIGN_CENTER);
butgrp.setMode(ButtonGroupMode.MultiSelection);

butgrp.setLabels("Left", "Middle", "Right", null, null, "Five");
butgrp.setImages(
  UIImage.getImage(UIImage.OK_SMALL),
  null, null,
  UIImage.getImage(UIImage.TRASH_SMALL),
  UIFontAwesome.getImage(IFontAwesome.ADN_SMALL));

butgrp.eventAction().addListener(this::doButtonGroupChanged);
```
