

Table of Contents

On mobile devices, a checkbox should sometimes look like a switch (e.g. for settings). If you want to show a switch instead a checkbox, simply use the following style:

```
//UICheckBox
Style.addStyleNames(checkbox, "f_switch");
//UIEditor
Style.addStyleNames(editor, "f_switch");

//cell editors
cellEditor.setStyle(new Style("f_switch"));
```

It's possible to set an unbound checkbox as switch, a bound editor or a cell editor (for table and editor).

The result looks like:
