

Table of Contents

Our labels have a default height because of extra top and bottom padding. The label is as high as a textfield. This is great if the text is left or right to a textfield, but for simple text labels without textfield this is not stylish.

We have additional styles regarding padding:

```
f_padding_top_0  
f_padding_top_2  
  
f_padding_bottom_0  
f_padding_bottom_2
```

0 means no padding

2 means half default padding

As usual, add the style to your label

```
Style.addStyleNames(label, "f_padding_bottom_0");
```
