

Table of Contents

We have stable releases and nightly builds. All downloads are available as manual download or Maven artifacts.

Manual Download

The place for our **stable releases** is the [JVx project site](#).

Our **nightly builds** are available [here](#).

Maven

If you want to use Maven, simply use [Maven Central](#). JVx is available in different packages:

- [jvxall](#) contains the full package (client and server)
- [jvxclient](#) only the client part
- [jvxserver](#) only the server part

Here's an example dependency for your pom.xml:

```
<dependency>
  <groupId>com.sibvisions.jvx</groupId>
  <artifactId>jvxall</artifactId>
  <version>2.8.5</version>
</dependency>
```

All of our nightly builds are available as snapshots too:

```
<dependency>
  <groupId>com.sibvisions.jvx</groupId>
  <artifactId>jvxall</artifactId>
  <version>3.0_beta-SNAPSHOT</version>
</dependency>
```

```
<repository>
  <id>sonatype-nexus-snapshots</id>
  <name>Sonatype Snapshots</name>
  <url>https://oss.sonatype.org/content/repositories/snapshots/</url>
</repository>
```

The nightly builds are created daily. These are test versions based on current source code. We don't offer support for these versions!
